

BEGINNING ACRYLIC PAINTING

Learn to paint with Acrylics, in this easy class designed for beginners, or even if you already use Acrylics and just want to brush up on different techniques. Taught by award-winning artist Ann Marie Campbell, you will learn concepts such as shading, using washes, and much more. One concept will be taught each week, so that at the end of six sessions, you will be familiar with six different techniques.

Each session is a "guided practice", meaning that you will follow along with Ann as she selects a different project each week, and you will finish each one during the session. All materials are supplied, so there is no huge investment while you are beginning to explore Acrylic Painting.
